

ITC Curriculum Assessment (Level 3) Learning Experience Development and Implementation

ITC Competencies	CPD1: Identifies foundational components of high-quality, responsive, infant and toddler care. CPD2: Identifies culturally, individually, and developmentally responsive curricular strategies that nurture infant/toddler development, learning, mental health, and well-being. CPD3: Plans and implements, in partnership with families, culturally, individually, and developmentally responsive curricular strategies and interactions that nurture infant/toddler development, learning, mental health, and well-being.
NAEYC	1a, 1b, 1c, 2c, 3a, 4a, 4b, 4c, 5a, 5b, 5c, 6e
IPTS	1A, 1B, 1C, 4C, 7A, 7B, 8A, 8C, 8G
Original ITC Gateways Benchmarks	2-4D1-9, 2-4D12, 2-4E12, 2-4E13, 2-4G14, 5C1, 5D1-7, 5D12, 5E12, 5G10

Assessment Guidelines

In this Assessment, you will be developing and implementing a daily learning experience plan for a group of infants and/or toddlers. Your planning will encompass five days, and implementation of two of the outlined learning experiences are required. The purpose of this Assessment is to determine your competencies in the areas of identifying foundational components of high quality care; culturally, linguistically, and developmentally responsive curricular strategies; planning, implementing, and assessing appropriate learning experiences; describing and selecting appropriate content; and advocating for effective curricula and learning experiences that nurture infant/toddler development, learning, mental health, and well-being.

Successful completion of this Assessment requires that it be conducted during a clinical or with a group of infants/toddlers with whom you have access. If you do not have an infant/toddler classroom where you have ongoing contact, please make arrangements to meet with the teacher to both plan for your Assessment and learn more about the children you will be working with. When you meet with the cooperating teacher, be sure to ask about relevant assessment data and information about the learners in the classroom, which would be beneficial in terms of your lesson planning and implementation.

Part I: Pre-Planning Reflection:

Prior to planning your lesson, it is important to foundational components of quality care that will inform your planning. As well, you need to consider the unique learners you will be working with and cultural, linguistic, and developmentally responsive strategies for those learners, as well as the evidence that supports effective curricular practices. Finally, it is also essential to consider mandates and requirements, including building, center, and curricular factors, that must be adhered to in your planning. Consider each of these, and develop a 1-2 page reflection that responds to:

- Foundational components of high-quality, responsive infant and toddler care you need to take into account when development your learning experiences.
- Data that will be beneficial to you in your learning experience development, including how you will connect with families.

Part II: Learning Experience Development:

You will be required to develop learning experience plan based on the developmental, cultural, and linguistic needs of a child observed between the ages of 6 weeks and 3. Your first step in developing your Learning Experience Plan is for you to observe the child you have selected. Use the Developmental Profile to summarize your observation. Based on the Developmental Profile and the Early Learning Guidelines, write a complete the **Observation and Curriculum Planning Form** based on the targeted child's development and learning profile. Please complete the number of forms needed to support the development of a Learning Experience Plan that encompasses each of the child's developmental domains. Your Learning Experience plan is required to include the following components:

- Developmental domains targeted
- Observation data
- How will the learning experience nurture infant/toddler development, learning, mental health, and well-being?
- What do you know about this group of learners that justifies presenting this learning experience in the proposed manner?
- Identification of how the learning experiences support the young child's emerging understanding of literacy, math, and science
- Evidence-based practices, theory, research, and standards that are relevant to your planning
- What specific measurable and/or observable outcome(s) will learners be expected to achieve at the end of the implementation of the learning experiences, aligned with appropriate standards
- An overview of experiences and strategies that will support child construction of knowledge through plan, exploration, and experimentation

Part III: Learning Experience Plan

- Complete the Learning Experience Plan.

PART IV: Learning Experience Implementation

- You will be required to work with your cooperating teacher to implement two of the learning experiences identified. You will also need to arrange to have a peer video tape a 10-15-minute portion of your teaching using your cell phone or device. This video will not be submitted. You will use this video as a reflection tool to guide you in developing your teaching.

Part V: Post-Reflection

After you have developed and implemented the lesson, respond to the following:

- How effective were these strategies in supporting young children's development and learning?

Assessment Rubric (pulled from ITC Master Rubrics)

ITC Curriculum Assessment (Level 3): Learning Experience Development and Implementation Rubric					
Competency	Distinguished	Meets	Approaching	Unacceptable	Unable to Assess
<p>CPD1: Identifies foundational components of high-quality, responsive, infant and toddler care.</p> <p>NAEYC: 1a, 1b, 1c, 4a, 5a, 5b, 5c, 6e IPTS: 1A, 1C, 8A, 8G ITC: 2-4D3, 2-4D5, 2-4D7, 2-4D12, 2-4G14, 5D1, 5D12, 5G10</p>	<p>Provides examples of how foundational components of high-quality infant and toddler care, including relationships, play, and continuity of expectations between practitioners and settings, are represented in curriculum for infants and toddlers and their families.</p> <p>Provides examples of how abilities fostered during the infant-toddler period relate to the child's emerging understanding of literacy, math, and science.</p> <p>Names sources of evidence-based practices, theory, research, and state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program Standards).</p> <p>Identifies strategies supportive of family knowledge of the foundational components of high-quality, responsive, infant and toddler care.</p>	<p>Provides examples of how foundational components of high-quality infant and toddler care, including relationships, play, and continuity of expectations between practitioners and settings, are represented in curriculum for infants and toddlers and their families.</p> <p>Provides examples of how abilities fostered during the infant-toddler period relate to the child's emerging understanding of literacy, math, and science.</p> <p>Names sources of evidence-based practices, theory, research, and state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program Standards).</p>	<p>Provides examples of how foundational components of high-quality infant and toddler care are represented in curriculum for infants and toddlers and their families.</p> <p>Provides examples of how abilities fostered during the infant-toddler period support infant/toddler understanding of literacy, math, and science.</p> <p>Names sources of evidence-based practices, theory, research, or state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program Standards).</p>	<p>Provides incomplete or inaccurate examples of how foundational components of high-quality infant and toddler care are represented in curriculum for infants and toddlers and their families.</p> <p>Provides incomplete or inaccurate examples of how abilities fostered during the infant-toddler period support infant/toddler understanding of literacy, math, and science.</p> <p>Names inaccurate sources of evidence-based practices, theory, research, or state and national standards relevant to providing care and education to infants and toddlers (e.g., Illinois Birth-3 Program Standards).</p>

Observation and Curriculum Development Planning Form

Child's Name: _____

Child's Age: _____

Date: _____

Time: _____

Observation strategy utilized:

Domain(s):

Observation:

Guiding questions:

- What skills or activities appear to lead to frustration or challenge?
- How does the child seem to prefer to interact with the world?
- What developmental skill does s/he appear to be working on?
- What holds the child's interests in the environment?
- What else do I need to know?
- What questions do I have for the child's family?

Reflection on interaction between child and environment

- Child's preferences regarding relationships
- Daily routines
- Child's strategies for interacting with the environment:

Reflection on unique learning needs

- Creative Expression
- Family context (culture, language)
