Assessment Guidelines

In this assessment, you will be developing and implementing a learning experience plan and assessing and designing environments based on your knowledge of the development and learning of one child between the ages of 6 weeks and 3. You will be required to implement of two of the outlined

learning experiences. The purpose of this Assessment is to determine your competencies in the areas planning and implementing appropriate infant-toddler curriculum, designing engaging environments, and engaging in nurturing and supportive interactions.

Successful completion of this Assessment requires that it be conducted during a clinical or with a group of infants/toddlers with whom you have access. If you do not have an infant/toddler classroom where you have ongoing contact, please make arrangements to meet with the teacher to both plan for your Assessment and learn more about the children you will be working with. When you meet with the cooperating teacher, be sure to ask about relevant assessment data and information about the learners in the classroom, which would be beneficial in terms of your lesson planning and implementation.

Part I: Pre-Planning Reflection:

Prior to planning your lesson, it is important to foundational components of quality care that will inform your planning. As well, you need to consider the unique learners you will be working with and cultural, linguistic, and developmentally responsive strategies for those learners, as well as the evidence that supports effective curricular practices. Finally, it is also essential to consider mandates and requirements, including building, center, and curricular factors, that must be adhered to in your planning. Consider each of these, and develop a 2-3 page reflection that responds to:

- Foundational components of high-quality, responsive infant and toddler care will incorporate into planning your learning experiences.
- Strategies you will use gather information about the child's development and learning, including observational data as well as data you will gather from family members.
- An overview of strategies, including guidance techniques, you will use to form affectionate, responsive relationships with the infant/toddler

Part II: Observation and Learning Experience Development

You will be required to develop learning experience plan based on the developmental, cultural, and linguistic needs of a child observed between the ages of 6 weeks and 3. Your first step in developing your Learning Experience Plan is for you to observe the child you have selected. Use the Developmental Profile to summarize your observation. Based on the Developmental Profile and the Early Learning Guidelines, write a complete the **Observation and Curriculum Planning Form** based on the targeted child's development and learning profile. Please complete the number of forms needed to support the development of a Learning Experience Plan that encompasses each of the child's developmental domains. Your Learning Experience plan is required to include the following components:

- Developmental domains targeted
- Observation data
- Reflection based on individual child's needs/preferences regarding relationships, routines, and the environment
- How your plan will incorporate each of the following:
 - Ensuring the child's safety
 - Promoting the child's health
 - Ensuring the child's comfort
 - Support choice
 - Responsiveness to nutrition and interactions that promote healthy development, learning, mental health, and well-being
- Strategies that you will employ to ensure positive interactions with family members
-

- How you will collaborate with the family to gather knowledge of the young child’s healthy development, learning, mental health, and well-being
- How you will ensure that the indoor and outdoor play environment is responsive to the individual child’s needs

Part III: Learning Experience Plan

Complete the Learning Experience Plan.

PART IV: Learning Experience Implementation

You will be required to work with your cooperating teacher to implement two of the learning experiences identified. You will also need to arrange to have a peer video tape a 10-15-minute portion of your teaching using your cell phone or device. This video will not be submitted. You will use this video as a reflection tool to guide you in developing your teaching.

Part V: Post-Reflection

After you have developed and implemented the lesson, respond to the following:

- How effective were these strategies in supporting the development, learning, mental health, and well-being of the child you observed?
- What strategies do you feel are more effective to share the importance of your learning experiences with families, including how the experiences support infant/toddler communication, well-being, and positive interactions with their physical and social world?

Assessment Rubric (pulled from ITC Master Rubrics)

ITC Custom Assessment (Level 3): Curriculum and Environment Design Rubric					
Competency	Distinguished	Proficient	Needs Improvement	Unsatisfactory	Unable to Assess
<p>FCR2: Demonstrates behavior that reflects confidentiality and awareness of the unique role of providing services to infants/toddlers and their families.</p> <p>NAEYC: 6d IPTS: N/A ITC: 2-4G11, 2-4G12</p>	<p>Provides examples of unique confidentiality issues and responsibilities that may arise in providing services to infants/toddlers and their families.</p> <p>Engages in behavior reflective of confidentiality.</p> <p>Engages in behaviors reflective of understanding the unique role of providing services to infants/toddlers and their</p>	<p>Provides examples of unique confidentiality issues and responsibilities that may arise in providing services to infants/toddlers and their families.</p> <p>Engages in behavior reflective of confidentiality.</p> <p>Engages in behaviors reflective of understanding the unique role of providing services to infants/toddlers and their</p>	<p>Provides limited examples of unique confidentiality issues and responsibilities that may arise in providing services to infants/toddlers and their families.</p> <p>Engages in behavior reflective of confidentiality on a fairly consistent basis.</p> <p>Generally, engages in behaviors reflective of understanding the unique role of providing services to infants/toddlers and</p>	<p>Does not maintain confidentiality.</p> <p>Behavior not reflective of understanding the unique role of providing services to infants/toddlers and their families.</p>

Observation and Curriculum Development Planning Form

Child's Name: _____

Child's Age: _____

Date: _____

Time: _____

Observation strategy utilized:

Domain(s):

Observation:

Guiding questions:

- What skills or activities appear to lead to frustration or challenge?
- How does the child seem to prefer to interact with the world?
- What developmental skill does s/he appear to be working on?
- What holds the child's interests in the environment?
- What else do I need to know?
- What questions do I have for the child's family?

Reflection on interaction between child and environment

- Child's preferences regarding relationships
- Daily routines
- fChild's strategies for interacting with the environment:

Reflection on unique learning needs

- Creative Expression
- Family context (culture, language)

Goals and Objectives

Goal: _____

Objectives: _____

Ensuring child's safety	Promoting Child's Health	Ensuring Child's Comfort	Nutritional Factors	Supporting Child's Emerging Understanding of Literacy, Math, and Science
