

## ITC HGD Assessment (Level 3) Developmental Presentation

<b>ITC Competencies</b>	HGD1: Explains the developmental trajectory of children birth to three and outlines realistic expectations for infant/toddler knowledge, capabilities and behaviors. HGD2: Describes ways that attachment, development, and learning, prenatal-age 3, are influenced by early environments and experiences (e.g., adult/child interaction, opportunities for exploration). HGD3: Describes individual differences in infants and toddler’s interactions with and responses to the physical and social world. HGD4: Identifies how early relationships with and among caregivers influence healthy development and learning, prenatal-age 3. HGD5: Explains interrelationship between unique developmental trajectories and early relationships (e.g. attachment, trust) with primary caregivers on infant and toddler development, learning, mental health, and well-being.
<b>NAEYC</b>	1a, 1b, 1c, 4a, 4c, 5a, 6c, 6d
<b>IPTS</b>	1A, 8A, 8B, 8C, 8D, 8E, 8G, 8J, 8M, 9A
<b>Original ITC Gateways Benchmarks</b>	2-4A2, 2-4A9, 2-4A12-15, 5A3

### Assessment Guidelines

As a teacher in an early childhood classroom, you are interested in developing an engaging presentation that highlights the importance of development in the first three years of life. The audience for your presentation is either early childhood professionals or families.

You’ve identified the following content as essential information to share:

- The importance of knowing developmental milestones and understanding patterns of development.
- An overview of development for young children ages birth-3, including milestones and how these milestones inform knowledge of young children’s knowledge, capabilities, and behaviors.
- How children interact and respond in unique ways to their physical and social world.
- Why trust and attachment are so important, and how healthy foundations regarding how trust and attachment can be supported.
- Strategies caregivers/family members can use to ensure the healthy development of trust and secure attachments.
- The importance of positive relationships with caregivers and strategies that can be used to foster these relationships.
- Why understanding each child’s unique developmental trajectory and unique interactions with the world is essential to identifying realistic expectations and creating a good fit for young children.

Presentation format:

You may elect to develop your presentation in a variety of ways, including a PowerPoint, blog, short video, or social media tool.

Presentation guidelines:

You are required to cover each of the topics noted above in a meaningful and concise way. For each topic, include a general overview of each of the three bulleted points, which includes a rationale and examples. Each bullet point should include 5 items that provide supportive evidence.

Assignment requirements also include the following:

- Discussion of age span across the birth to three continuum
- Integration of course materials, with appropriate citations
- An engaging presentation
